Published, by permission, by GEORGE GODWIN, Esq. F.R.S.

ARCHITECTURAL BOTANY; setting forth the Geometrical Distribution of Foliage, Flowers, Fruit, &c. with twenty original Designs for decorating Furniture, Pannelrils, Cornices, Cornices, Chandeliers, Frames, Panels, &c. Among other plants selected, are the Adiantum Monochlamium, Nasturtium Aquaticum, Geranium Tricuspidatum, Nepeta Glechoma, Tropæolum, Aquilegia Vulgaris, Ranunculus Ficaria, &c.

By W. F. GRIFFITH, F.R.A., F.L.B.A.
G. R. John Gregory, London.

The very interesting study of Architectural Botany has occupied the attention of Mr. Griffith for many years. In a letter to the "Architectural Publication Society," Oct. 28, 1848, he suggested the subject, which was printed in "The Builder," Dec. 9, in the same year. The object Mr. Griffith has in view, is that of reference to the public the laws, dictated by nature, suitable for art

Part II. will shortly be published.

Price 1s. cloth, with Plates.

THE BRITISH WINTER GARDEN a practical Treatise on Evergreens; showing their general utility in the formation of Gardens and Landscape Scenery, and their mode of Improvement. Planting, Insect Removal, from one to fifty feet in Height, as practised at Elvaston Castle

By WILLIAM BARRON, Head Gardener.
BRADBURY and EVANS, 11, Bouverie-street.

Price 1s. 6d. boards in cloth.

HOW TO LAY OUT A SMALL GARDEN. Intended as a Guide to Amateurs in Choosing Forming, or Improving a Place

A full list of prices may be had on application.

DURRAND'S "BONDED and SUFFERANCE WHARF," TIMBER PRESERVING WORKS, BOTHENHITHE—BETHELL'S process consists in preparing timber with creosote, or oil of tar, and is particularly applicable for Railway Sleepers, Bridge Timber, Telegraph Posts, Piers, Docks, Harbours, &c.; and the Patents Planking of Ships and Barges, as a plan for use in the colonies, as being perfectly impervious to the attacks of all land or marine insects. PAYNE'S, BURNETT'S, and HARGREAVE'S processes, in addition to their preservative properties, are likewise non-combustible, and are, consequently, adapting in her Majesty's Dock Yards, as a preventive of fire in Ship Building; and are also extensively used in House Farm, and general Building.

Extensive and most complete Machinery for the application of the above processes has been erected on these premises, which, being close to the great Timber Depot of the docks, are advantageously situate for land conveyance, or re-shipment; and from possessing Sufferance Privileges are, consequently, equally applicable for Colonial and Foreign Trade.

Scale of charges and every particular of P. ST. QUINTIN, Superintendent, on the Wharf; or at Mr. BURTT'S office, 3, Charlotte-row, Mansion-house, City.

DAMP WALLS.—NEW PATENT PAINT, as used at the TOWER, by order of HER MAJESTY'S HONOURABLE BOARD of ORDNANCE; at the TUNNEL; ROYAL GOLA GARDENS, Regent's-park, and various other public and private buildings; in quantities to cover twenty square yards for 1l.

PATENT LIQUID CEMENT for the fronts of houses, for beauty pre-eminent, giving the appearance of fine cut stone, and only one-eighth the cost of Oil Paint. In coats of 1, 2, and 3 cwt. at 8s. 12s. and 16s. each.

PATENT MINERAL ZINC PAINTS, invaluable for stone, for beauty, and permanence, ready for use. Warm Stone and Lead, 8s.; Greens and Blues 10s. per gallon.

BLACK MINERAL PAINT, very permanent, half the usual price; only 6s. per gallon.

NEW PATENT COLOUR for inside work, may be applied on Wood, Stucco Cement, or over Oil Paint. No smell, and will dry in an hour. In casks of 1 cwt. at 14s.

G. BELL and CO. Steam Mills, 8, Wellington-street, Cornwall-street, London.

OAK STAINING and VARNISHING.—Staining and Varnishing of Churches, Chapels, &c. done for the trade at 1d. per foot by JOB WILLIS, High-street, Kingsland, Old Ford, E. per gallon.

STAINING DEAL TO IMITATE ALL KINDS of WOODS. It requires no staining, and will stand the exposure to the weather. Price 6s. per gallon. Varnishes for W. NAYLOR'S stains may be had at the Factory, 37, James-street, Oxford-street.

HUBBUCK'S PATENT WHITE ZINC PAINT.—The PERMANENT WHITE of the Artizan, by its constituent Lithopone restricted to the use of the artist, is now offered at the price of the ordinary white lead.

Four years since the proprietors planned their manufactory on a large scale, and put this compound Paint in competition with White Lead.

Its exclusive superiority over every other paint hitherto known brought forward various imitations.

These inferior productions, frequently made from mine ores, containing lead, arsenic, and other deleterious material, alike injurious to health, deficient in body, and reducing the preservative properties for which the original paint stands pre-eminent.

In justice to the proprietors them-selves must be contrasted with the original, even though sold under the pretence that it is all the same.

Hubbuck's paint is entirely free from any injurious properties whatsoever; it is beautiful in the manufactory, healthful to use, and beautiful to occupants of rooms newly painted with it.

As a guard to the painter against the substitution of the inferior paints each cask is stamped

* HUBBUCK, LONDON, PATENT *

and if the cask has not been so marked, the reason is obvious.

The powdered White Zinc also may be used for grinding in oil also for water painting, cards for paperers, for prints, cards, and for painter decorations, and the other purposes where it is used with glue, gum, varnish, paste, &c. &c.

A circular with full particulars may be had of THOMAS HUBBUCK and SON, Colour Manufacturers opposite the Artizan Docks.

PURE PATENT WHITE ZINC PAINT of the VIEILLE MONTAGNE ZINC MINING COMPANY of BELGIUM.—This Paint is superior in every respect to White Lead, both in purpose as whiteness and brilliancy: it covers very much after it is spread, and is, therefore, supportable of a very high polish. It is unaffected by sea-water, sulphuretted hydrogen, or any other gases.

WHITE ZINC PAINT having none of the poisonous qualities of White Lead, avoids the dangerous sickness to which workmen, as well as persons inhabiting newly-painted houses, are subject.

The VIEILLE MONTAGNE COMPANY import the Oxide in casks bearing their mark, VM, without which none are genuine, and is to be obtained duty or ground as the Company's Agents at the following places, viz.—London, Liverpool, Birmingham, Hull, Newcastle, Leeds, Gateshead, Plymouth, Norwich, Ipswich, Dublin, Cork, Belfast, Jersey, Portsmouth, Poole, and the Isle of Wight; and from Messrs. Blundell, Spence and Co. Hull. It may also be obtained from the Grinding Agents Messrs. C. DEVAUX and Co. 28, King William-street, City. Wholesale Agents, Mr. Charles Jack, 4, Commercial-court, New-road, and 9, Upper Thames-street, who sells at in bags of 14 lbs. 28 lbs. and upwards at low rates; and Messrs. E. Anderson and Co. Trinity-bush, Leith, wholesale and retail.

The Company also employ a painter, who will undertake any description of painting in Zinc by contract.

From its introduction into the United Kingdom, the Admiralty and the most eminent professional men have given it their preference. The public is cautioned, that if White Zinc Paint is not attended, it becomes a very inferior paint, and peels and washes off.

For further particulars apply to Mr. H. T. SCHWOLL, General Agent for the United Kingdom, at the Company's offices, 11, Manchester-buildings, Westminster.

THE VIEILLE MONTAGNE ZINC MINING COMPANY beg to inform the public that they have appointed Messrs. T. and B. KNIGHT, of Upper Bedford-street, as their painters, who will be ready to execute any description of painting and decorating with the Pure Patent White Zinc Paint.

THE WASHINGTON CHEMICAL COMPANY, NEWCASTLE-ON-TYNE,

Manufacturers of

PATTINSON'S OXICHLORIDE of LEAD.—The Washington Chemical Company having, during the last year, established a Manufactory of Pattinson's Oxichloride of Lead on a large scale, and being able to supply it with regularity, and to execute orders without delay, now proceed to bring the new and valuable preparation of Lead before their friends and the public, quite sure that it will not, in the present age, be condemned because it is new, and that if judged by its merits it must make its way, and finally take its place as one of the important manufactures of this country.

Pattinson's Oxichloride of Lead is a chemical combination of one equivalent of Chloride of Lead, and one equivalent of Oxide of Lead. It being well known that common White Lead is a chemical combination of one equivalent of Oxide of Lead, and one equivalent of Carbonic Acid, constituting in fact it called in chemical language, Carbonate of Lead. Now there is no reason to conclude that Carbonate of Lead is the only compound of lead valuable as a paint and still less that it should be the best compound of lead for that purpose. In point of fact it is not so, for the newly-discovered Oxichloride is most, if not in all respects, in the Proprietor's opinion in brilliancy of white, and in a number of cases it has been tried against the best White Lead that could be obtained, and after a period of upwards of two years it has been found to retain its white colour considerably better than the lead against which it was tried.

But the object aimed at by far the most important advantage it possesses in the remarkable and very decided superiority of Body; by which term the power of covering surface well and extensively, is understood among Painters. The attention of the discoverer was at a very early period drawn to this circumstance, and since that time the Washington Chemical Company have had abundant opportunities of placing the superiority in this important particular beyond all doubt. They have themselves performed a number of experiments and have also caused a number of experiments to be performed in the same way, by various professional men, to ascertain accurately its covering power as compared with the best White Lead, and they have found the proportions to be as 60 to 100; that is, 60 lbs. of Oxichloride Paint will cover as much surface as 100 lbs. of best White Lead, the saving of cost being in the same proportion; besides this, the covering is thicker and more protective, both in and out of doors, so the Oxichloride dries into a hard, tenacious layer, more like an Enamel than paint.

In using the Oxichloride, no difference in the materials with which it is mixed is required. Oil and Turpentine being employed as usual, both for work technically called Painting, and for work intended to be varnished. For the use of Paper Hangers and Leather Dressers, the Oxichloride is found to be peculiarly suitable. The Washington Chemical Company strongly recommend this newly-discovered substance to the notice of consumers, both on account of its economy, and its intrinsic good qualities as a paint.
